Hayward Creative Community Group
Save the Old Hayward Library Project

Our mission is to improve and revitalize the Hayward community by providing an open place for art and community work created and presented by local artists, artisans, craftspeople, creators, and community members, organizations and artistic institutions.

We embrace the notion that everyone benefits from access to artistic and creative efforts in a convenient, aesthetic and accessible environment, and that using the existing Hayward Public Library structure as the location for a *Hayward Creative Community Space* once the new 21st Century Library is completed and operational will directly enhance the plaza through these public uses.

If you agree with the purpose of our project, please let us know who you are and how we may best contact you to keep you informed of our efforts to make this happen.
