Steve Mitchell, Lisa Nemzer, Eric Nordskog, Cynthia
Palmer, Tom Ogden, and Rob Roy.

Abstract

Our study investigates the methods, costs, and benefits of establishing organic agriculture in Isla Vista. This will be divided into the following major parts: community gardens, an experimental-demonstration center for the exploration of intensive agriculture and alternative technologies, natural preserves, and means of obtaining and storing water.

The Farm Project would like to thank the following people for their help with this study:

Steve Adamsky and the Environmental Defense Center, John Everts, Don Hudson, Martin Kellogg, Ray Anderson, Lorie Brown, Vernon Homan, Paul Wells, Charlie Stares, Ann Howell, and Jim Wickel.

ACKNOWLEDGEMENTS

The Farm Project would like to thank the following people for their help with this study:

Steve Adamsky and the Environmental Defense Center, John Everts, Don Hanson, Martin Kellogg, Ray Anderson, Lorie Bacon, Vernon Human, Paul Relis, Charlie Bierer, Ann Howald, and Jim Nickel.
